

Kathaluwa Liyanage Nishadi Madubashini

Data Analyst | 07466 276076 | Leeds, UK

kathaluwa.liyanage92@gmail.com | LinkedIn/Nishadi-Madubashini | github.com/Madubashini1021

Technical Skills & Core Competencies

Programming & Analytics: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL, Exploratory data analysis, Statistical modelling

Data Analysis & BI Tools: Power BI (DAX, Power Query), Tableau, Excel, Data visualisation & storytelling

Databases & Warehousing: PostgreSQL, MySQL, MS SQL Server, MongoDB, Neo4j, Hive

Cloud & Data Engineering: AWS (S3, Glue, Athena), Spark (PySpark), Kafka, ETL pipeline development

Product & Agile Skills: Agile & Scrum fundamentals, Requirement gathering, User story development, Stakeholder communication, Data-driven prioritisation

Experience

Data Analyst, Diamond International Lanka Pvt. Ltd – Sri Lanka Jan 2021 – Dec 2023

- Gathered and clarified business requirements, translating them into structured technical solutions and data workflows
- Translated business reporting requirements into scalable batch and real-time data pipeline solutions, enabling accurate product performance and customer usage insights.
- Analysed system performance and data workflows to identify optimisation opportunities, improving reporting accuracy and reliability for business stakeholders.
- Contributed to prioritisation of data and reporting requirements by assessing business impact and feasibility, supporting efficient delivery of high-value solutions.
- Collaborated with cross-functional teams (engineering and business stakeholders) to investigate and resolve complex data issues, ensuring system reliability and data integrity.

Projects

Executive Sales Performance Dashboard <https://github.com/Madubashini1021/PowerBI-project>

- Designed an interactive Power BI dashboard based on business reporting needs, translating stakeholder requirements into KPI-driven insights for decision-making.
- Tech: Power BI, DAX, Power Query, SQL

Retail Demand Forecasting

<https://github.com/Madubashini1021/Data-Visualization-on-Amazon-Customer-Behaviour-Data>

- Analysed customer behaviour and historical sales data to develop forecasting models supporting inventory and demand planning decisions.
- Tech: Python, Scikit-learn, SQL, Pandas, Power BI, Excel

Real-Time Stock Market Data Pipeline (Data Engineering)

<https://github.com/Madubashini1021/Stock-Market-Data-Pipeline-AWS-Kafka->

- Developed a real-time ETL pipeline to process streaming data, enabling near real-time analytics and performance monitoring.
- Demonstrated understanding of end-to-end data workflows and system design.
- Tech: Python, Apache Kafka, AWS S3, AWS Glue, Athena, SQL, Parquet

AI in Mergers & Acquisitions – Colombo Stock Exchange

<https://github.com/Madubashini1021/Impact-of-Mergers-and-Acquisition>

- Built predictive models to analyse stock performance and evaluate business outcomes using machine learning techniques.
- Tech: Python, Pandas, NumPy, Scikit-learn, ARIMA, LSTM, LightGBM, Matplotlib, Seaborn

Education

School – MSc Data Analytics (Merit) — University of Huddersfield, UK

July 2025

School – BSc Information Technology — SLIIT, Sri Lanka

Nov 2015
